

## Toshiba Solutions

Equipment for courses at Dudley College

### Equipment:

Toshiba Digital Inverter  
Split systems  
Toshiba Mini-SMMS  
Various control systems

*The Centre  
was opened by  
the local MP*

### Application details

Toshiba Air Conditioning has supplied six Split systems and a Mini-SMMS VRF system to the new Refrigeration and Air Conditioning Technical Training Courses facility at Dudley College for use in the training of students.

The £125k Centre has been created from a former welding area on the College's Mons Hill Campus.

The Centre was opened by the Labour Member of Parliament for Dudley North, Ian Austin, and the College's Principal, Jeanne Harding.

Toshiba Carrier UK Business Development Manager David Dunn said, "this is another signal that our company puts the highest possible emphasis on training."

"Thirty students are already on the programme, and we didn't even have to advertise it," explains Head of Division at Dudley College Kevin Stevens. There is a definite skills shortage in this area but without this equipment we could not run the course. With Toshiba's help as our industry training partner we are looking forward to expanding it further."

## Leading Innovation >>>

Toshiba Air Conditioning provides visiting lecturers on the programme.

The Toshiba air conditioning systems are installed in purpose-built test suites by the students on the Refrigeration and Air Conditioning City and Guilds NVQ Level 2 Course.

The College also offers certificate courses in Safe Refrigerant Handling.
