

PRODUCT BULLETIN

Refrigerant Monitoring & Containment

- **TCB-LD2**
- **RBC-RD6-PE**

*** **Compatibility Information** ***

TOSHIBA are pleased to confirm leak detection panel compatibility with current range of VRF outdoor units.

TCB-LD2

RBC-RD6-PE

1. **Leak Detection Panel Compatibility**

Models		
Leak Detection Panel	Compatible Outdoor Products	Notes
TCB-LD2	SMMSe, SHRMe, Mini SMMSe	Not compatible with VRF "i" version, RAV, RAS
RBC-RD6-PE*	SMMSi, SHRMi, Mini SMMSi	Not compatible with VRF "e" version
RBC-RD6-DI	RAV	Product withdrawn

* Please note this product will be withdrawn when stock of VRF "i" version has been diminished

2. **VRF "e" version**

Please note because "e" version systems use new software, which is embedded into the control logic of the CDU, previous VRF models such as VRF "i" series are not compatible.

3. **Leak Detection Panel TCB-LD2**

Residential RAS
Light Commercial RAV
Air to Water Estia

The above products have not been included due to the following two reasons; The refrigerant charge levels for the above systems are low in comparison to VRF and therefore the impact of a refrigerant leak is reduced; and the absence of a discharge pressure sensor on RAS, RAV and Estia CDU's could cause potential safety and reliability issues for these types of systems.
