## New 6 Series Dl-Big Re-use of Existing Pipework

TOSHIBA are pleased to confirm the data detailed below to enable the re-use of existing refrigerant pipework for the Digital Inverter 6 series DI Big outdoor units.

1. Introduction

- This bulletin is designed to help the designer to understand the restrictions and implications when re-using the existing pipework, particularly when the pipework is the wrong size.

2. Applicable Models

- RAV-SM2246AT8-E
- RAV-SM2806AT8-E

## 3. Standard Piping Conditions

- Below are the standard design conditions when using the correct pipe sizes. Please refer to section 4 when using the non-standard pipe sizes

| Sutdoor Unit | Allowable Pipe Length $(\mathrm{m})$ |  |  | Height Difference (m) |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
|  | Total Length L |  | Indoor - Outdoor H |  |  |
|  | Minimum | Maximum | Indoor Unit : Above | Outdoor Unit : Above |  |
