

Update Monobloc RUA-CP***1H8-E

TOSHIBA have recently moved production of a number of products from the Beroun factory in the Czech Republic to a larger UTC manufacturing facility at Montilla in Spain. The Toshiba Estia Monobloc 17kW and 21kW models were part of this transition. Unfortunately due to issues outside of our control, this has resulted in these particular units not being made available to us for a prolonged period of time, and therefore we have taken the decision to remove the product from the retail price lists and not have these particular units available in the near future in the UK and ROI markets.

1. Line Up

Affected Model Name	Status December 2019
RUA-CP1701H8-E	Availability suspended
RUA-CP2101H8-E	Availability suspended

2. Support

We are sorry for any inconvenience that this may cause, but we can confirm that we will continue to support the product in the market place with technical, warranty and replacements parts.

3. Alternative Products

We would like to highlight that we do have an extensive Monobloc range available to our customers from within the Carrier and CIAT brands.
